| 6. NSIC Rc 204H       | 1,250                        | 1,200     | 1,500,000.00          |
| <b>Total</b>          | <b>10,613 packs @ 3 kgs.</b> |           | <b>P12,735,600.00</b> |

These varieties are the top preferred varieties in all ecosystem in Bohol due to its high performance when it comes to yield per hectare and pests and disease resistant. Further, such private hybrid varieties were the best performing varieties during the National Rice Technology Forum Field Demonstration in San Jose, Talibon last 2018 where farmers in Bohol were able to participant. We have also technical experts available for these varieties. Furthermore, Gov. Art Yap during our training in Nueva Ecija last January 2020 instructed that we should plant top preferred varieties in Bohol for wet cropping season come this May 2020.

We are looking forward for your consideration and approval in support to our development agenda to increase rice production towards Farmers' Prosperity leading to rice self-sufficiency and food security of the province.

Thank you so much.

Very truly yours,
