MAESTRO CONTROLLED DESCENDER/ HAULING SYSTEM.. Great versatility, ideal for technical rescue:

- locking system with integrated progress-capture pulley allows the same device to be used for descent and hauling
- can be used in both a single or twin primary system and in a back-up belay (more information on this technique in the product's instructions for use and in technical tips at www.petzl.com)
- lower connection point can be used to create different types of hauling systems
- hole in the handle for installation of a distance control cord
- AUTO-LOCK system allows the rope to be blocked automatically when the handle is not in use. Once locked, the rope can be taken up without having to manipulate the handle.

Efficient for handling heavy loads:

- integrated progress-capture pulley with very large diameter sheave mounted on sealed ball bearings; rotates in only one direction for excellent hauling efficiency
- handling of loads up to 280 kg

Rope compatibility: 12.5 to 13 mm diameter

Specifications

Material(s): aluminum, stainless steel, nylon

Weight: 1100 g

Min. rope: 12,5 mm, Max. rope: 13 mm

Sheave type: faceted, on sealed ball bearings

Maximum working load: 280 kg (more information in the Instructions for Use and in the technical tips at www.petzl.com)

Breaking strength: 18 kN x 2 = 36 kN

Efficiency: 81 %

Certifications: CE EN 12841 type C, EN 341, NFPA 1983 General Use, EAC
